

ADACOM

SECURITY BUILT ON TRUST

Governance, Risk, and Compliance Services

About ADACOM

ADACOM is a leading cybersecurity solutions provider, delivering advanced services to organizations across industries. With a strong focus on security, compliance, and risk management, ADACOM helps enterprises navigate the complexities of the modern threat landscape by offering tailored cybersecurity strategies and robust governance frameworks. Our expertise extends across multiple industries, including financial services, healthcare, critical infrastructure, and government sectors, ensuring customized solutions that address unique security challenges.

Governance, Risk, and Compliance Services

Organizations today face an increasingly complex regulatory environment and growing cyber threats. Governance, Risk, and Compliance (GRC) services help organizations align their security strategy with business objectives, ensuring regulatory compliance while mitigating risks. Effective GRC implementation enhances resilience, fosters a security-first culture, and ensures sustainable business growth in an evolving digital ecosystem. ADACOM supports businesses in implementing comprehensive frameworks that integrate governance, risk management, and compliance processes into daily operations, fostering a proactive security posture.

▾ Roles as a Service

ADACOM provides specialized security and compliance leadership as a service, including Chief Information Security Officer (CISO) and Data Protection Officer (DPO) roles. These services offer organizations expert guidance in managing security governance, regulatory compliance, and risk management, ensuring adherence to industry standards and best practices. Our virtual and dedicated CISO and DPO services help organizations implement security policies, oversee compliance programs, and provide strategic direction for mitigating cyber threats and regulatory risks. By leveraging ADACOM's expertise, organizations gain cost-effective access to top-tier security leadership without the need for full-time in-house resources.

▾ Design and Implementation of ISMS

Establishing and maintaining an Information Security Management System (ISMS) is critical for safeguarding information assets. ADACOM designs and implements ISMS frameworks tailored to organizational needs, ensuring compliance with international standards such as ISO 27001. This service enables businesses to systematically manage information security risks and maintain continuous improvement in security posture. Our experts assist in gap assessments, policy development, risk management strategies, and certification processes, ensuring that organizations achieve and maintain compliance while strengthening their security governance.

➤ Consulting Services

ADACOM offers a suite of consulting services to help organizations assess and enhance their security posture.

Cyber Defense Assessment evaluates the maturity of security controls, providing organizations with a roadmap for enhancing their security capabilities. Risk Assessment identifies vulnerabilities and potential threats, ensuring organizations can proactively address security gaps. Threat Assessment analyzes external and internal threats to the organization, helping to develop threat mitigation strategies. Compromise Assessment detects past or ongoing security breaches, allowing organizations to respond swiftly and effectively to potential compromises. Demand Driven Specialist services provide tailored cybersecurity expertise to address unique organizational challenges, ensuring that businesses receive specialized advisory support on an as-needed basis.

➤ Assurance Services

To ensure the robustness of an organization's security defenses, ADACOM delivers advanced assurance services.

Penetration testing simulates real-world attacks to identify and remediate vulnerabilities, helping organizations fortify their security infrastructure. Red Teaming evaluates an organization's detection and response capabilities through simulated adversarial tactics, providing insights into weaknesses that may be exploited by threat actors. Vulnerability Assessment provides a comprehensive review of potential security weaknesses, helping organizations implement corrective measures before vulnerabilities can be exploited. These services enable organizations to proactively strengthen their security defenses and maintain regulatory compliance, ensuring continuous improvement of their cybersecurity posture.

➤ Compliance Services

Organizations must navigate an evolving regulatory landscape to ensure adherence to industry and governmental mandates. ADACOM's compliance services help businesses achieve and maintain compliance with critical regulations such as the Digital Operational Resilience Act (DORA), NIS2 Directive, General Data Protection Regulation (GDPR), and Payment Card Industry Data Security Standard (PCI DSS). Our experts provide comprehensive compliance assessments, policy development, gap analysis, and audit readiness support. By integrating regulatory requirements into security frameworks, we enable you to enhance operational resilience, protect sensitive data, and mitigate regulatory risks effectively.

Why Choose ADACOM for GRC Services?

With years of experience in cybersecurity, compliance, and risk management, ADACOM offers organizations a strategic partner in navigating the complexities of regulatory requirements and cyber threats. Our expertise, combined with our commitment to innovation, ensures that businesses receive customized solutions that align with their operational needs and regulatory obligations.
